

Medical and Dental Student Credit Hours

About these data: These data shows total credits attempted by Medical and Dental students as of the official snapshot (day 15 for fall and spring, and end of term for summer). Other activity may occur after snapshot, including late enrollments and withdraws. This additional activity is not accounted for in these official course registration counts. Medical and dental course registrations are not available within the SBU data warehouse; credit counts are attributed to the student record in an export from the CBase system. Credits from additional registrations in graduate and undergraduate courses by medical and dental students are also included.
