Laboratory Security

Laboratory security is everyone's responsibility. All laboratories must implement controls to restrict access, prevent theft or diversion of hazardous materials and equipment, ensure the safety for laboratory personnel and the public, and improve emergency preparedness and response.

REGISTER YOUR LAB

- All labs are required to register their space, lab staff and hazards in the EH&S Laboratory Registration System.

CONTROL ACCESS

- Restrict access to only authorized personnel.
- Question the presence of unfamiliar individuals in laboratories.
- Keep laboratory door locked when the lab is unattended.
- Keep keys and access cards in your possession.
- Implement increased controls, where required, for certain chemical, biological and radiological materials.
- Train all laboratory workers on security procedures and why they are important.

REPORT INCIDENTS

- Missing or unaccounted loss of equipment or materials.
- Suspicious activity.

Contact University Police 631-632-3333

For more information about these and other requirements, please review the Chemical Hygiene Plan, Lab Safety Policy, and the EH&S Laboratory Safety website at ehs.stonybrook.edu/programs/laboratory-safety/

Send any questions to LabSafety@stonybrook.edu

MAINTAIN an INVENTORY

- Know what hazardous materials are in the lab.
- Submit a chemical inventory annually to EH&S.
- Track purchases and verify receipt of materials.
